## Editorial basis

Stores and menus were checked as of Oct 4, 2026. Figures are observations within our survey scope; standing and seated formats are read separately.

# Foam over Chairs

What links these bars is the state of one glass. Brand, pour, glassware and cleaning are explained as an experience.

We looked at standing specialists and seated pouring bars together, but read the two formats apart.

# Brand Experience Spaces

## Sapporo Premium Beer Stand

Seongsu | Opened Jul 2025 | Sewang account

One brand, two pours: Perfect and Classic.  
First-anniversary figures: **about 96,000 glasses, 47,000 guests** (Jul 2026). Check the latest notice on glass limits before visiting.

## Kirin Ichiban Premium Beer Bar

Yeouido Hangang Park, cruise terminal 2F

A Kirin collaboration bar with a menu varied by pour and temperature. Standing space and terrace seating run side by side. Brand-owned and collaboration status are kept distinct.

Seongsu anniversary figures per the operator's release.

# Four Specialists That Put the Pour on the Menu

## Shinbashi Stand

Songdo · Munjeong | Geomdan status pending

Standing bar built on Suntory draft and usuhari glasses. Menu and Hanmac availability vary by branch.

## Asahi no Tomare

Bupyeong | Asahi · Orion

Choice menu: two-step, three-step or crisp pour. Naver headline beer ₩7,900. Hours per latest store notice.

## Yoittang Stand

Sinyongsan | Asahi · Orion

Creamy, Sharp, Soft and Milko served for comparison. Read signage apart from official certification scope.

## Isshonomi

Hapjeong | Orion

Perfect pour, thin glass and simple snacks. For any certification shown, check the issuer and its scope.

Naver store info and menus cross-checked with store materials (Oct 4, 2026).

Prices, taps and hours vary by branch and date.

# A Grammar of the Glass, Across the Metro Area

Openings, added branches and relocations differ. Stores with no clear opening date are not counted as new.

## Tachitachi Gwanggyo

Asahi, Suntory, Orion. Choice of pour; mixed seating and standing.

## Just Haengbok Bangi-dong

Orion, Cass. Seated format pairing meals, snacks and outdoor tables.

## Tokyo Stand Seongsu · Gangnam

Suntory with Creamy, Soft and Milko. Metro-area branches only.

## CIRCUIT Yeongtong · Dongtan

Suntory draft with a choice of foam ratio. Promo and regular prices kept apart.

## Kanpai Maekju Euljiro · Sinnonhyeon · Chungmuro

Beer-led operation around Sapporo and Yebisu. Out-of-area branches listed separately.

## Pokpo Maekju Pangyo · Sharosu-gil · Gimpo · Yeongtong

Overpouring to the brim. Pangyo expansion and move kept apart from new openings.

Public information as of Oct 4, 2026. Survey ledgers are kept separate so a single branch is not confused with a brand's total branch count.

# Counting by Branch

We re-checked 39 metro-area branches on Naver, separating place listings from visitor reviews as evidence. This is not a total market store count.

|    |                                                                      |
|----|----------------------------------------------------------------------|
| 37 | Existing list, evidence found<br>Place listing 35 · Visitor review 2 |
| 2  | Current status pending<br>Shinbashi Geomdan · Standing Bar Jeongi    |

### Four branches found off the list

Beolkeok, RUF Yeonnam, Maekju Sarang Swimteo and Kanpai Maekju Chungmuro Hyeongje were added off the list. Standing, mixed and craft formats recorded separately.

### Reading tap counts

So / The Hoesang (Chungmuro) had Suntory missing from the earlier record; Akeru also carries Suntory. Do not rank one brand, Suntory, against several domestic brands combined.

Sodosi and Hopujip rest on visitor reviews. Pending does not mean closed. Branch addresses, IDs and evidence are in the survey ledger. Checked Oct 4, 2026.

# More Stores to Watch

Four standing operations confirmed outside the existing ledger, plus missed craft bars and chain branches.

# Interest in the Pour

Jan-Aug 2025 and 2026 compared under identical keyword conditions, by re-summing the monthly figures in the existing Sometrend raw data.

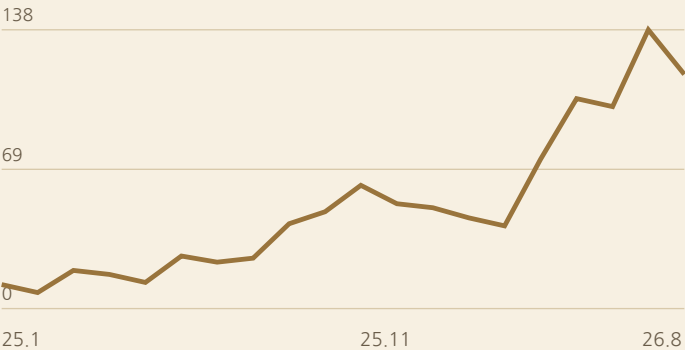

4.7x

Instagram 143 → 668 posts

2.2x

Naver Blog 1,191 → 2,639 posts

Instagram posts per month

## How far the rise can be read

Words for pour, glass and quality gained exposure. More posts do not mean more guests or sales; promotion, sponsorship and scope affect the count.

8 keywords OR (perfect pour · perfect pouring · pouring · Milko · usuhari · draft beer specialist · Draft Master · beer stand) + 'beer'. Chart: Jan 2025-Aug 2026. Recalculated from existing data, separate from new September queries.

# Six Ways to Pour

Menu names vary by store. Foam ratios here are a taste schematic, not a standard shared by every brand.

## Perfect

Two-step; Sapporo's 7:3 standard

## Classic

Poured in one go. Ratio varies by store

## Milko

Dense wet foam, nearly a full glass

## Sharp

Less foam, more carbonation

## Creamy · Soft

Foam and texture tuned softer

## Pure

Pour with almost no foam at all

### Temperature and keg care

Usuhari means a thin glass. Sapporo states 2-6°C; Asahi Extra Cold is -2-0°C. Keg rotation, gas and storage follow brand and equipment guides.

# Guest Reviews, Verbatim

Of 25 blog posts found via Naver search, we read 24 after excluding one about a different venue, comparing real visits to standing, mixed and seated bars.

## Foam and choice make the experience

Nosit Beer and Via reviews praised the soft texture and the fun of comparing pours. Some felt the foam made the serving seem small.

## Keep quality and notices consistent

Standing Biru reviews cited sold-out brands, opening-hours notices and uneven pours. Promotion and the floor must stay consistent.

## One light glass, a short stay

Via, Beer Hall Jung and Kiwon drew praise for short visits. As with Yoittang's queue and prepay rules, space and ordering also shape the experience.

Action points: state foam, volume and price up front; keep sold-out items and hours current; pour to one standard.

Posted Nov 16, 2025-Oct 3, 2026; collected Oct 4. Non-random sample; sponsored posts flagged. Not a satisfaction or complaint rate for all guests.

Market figures: Asahi 22.3% is its share of imported-beer volume in the home channel, H1 2025. Sapporo +52% is H1 2026 Korea sales volume (company release). Japanese 46.9% is the share of import weight in the same period.

# A Plaque Is Not a Licence

Plaques, personal licences and brand tie-ups differ. We check the issuer and whether applications are open.

## Asahi · Orion

Lotte Asahi Liquor

Draft Master and certified-store signage appear in store materials and press. For current Korean criteria and applications, ask your sales representative.

## Store signage vs MDM licence

Suntory signage / MDM personal licence

MDM is a registered private licence for draft-beer quality control; a personal licence is not a store award.

## Sapporo · Yebisu

M's Beverage

Sapporo sets out its 3C quality standard. Yebisu's official site describes three tiers: Partner, Gold, Master.

## Kirin collaboration beer bar

HiteJinro

Read as a collaboration case. It is not a certification scheme open to ordinary restaurants.

[MDM licence guide](#) · [Yebisu official tiers](#)

That a scheme exists is distinct from a claim that every store can apply.

# Japan's Tachinomi, Four Types

## 01 Kakuuchi

Drinking at the liquor shop

Drinks bought at a liquor shop, drunk on the spot. Some serve snacks, so 'no food' is not a rule.

## 02 Popular standing pub

A light drink with snacks

Oden, skewers and fair prices. Banpaiya's 48 outlets (Jul 2026, operator figure) is a chain-wide count that includes seated stores.

## 03 Pour-specialist beer stand

One brand, many tastes

Pour styles and glass limits become the experience. THE BAR's two-glass limit is per visit, not per day.

## 04 New-style standing bar

Wine, craft, refined snacks

Wider drink and food choice. In Korea, beer-only standing bars and multi-drink tachinomi coexist too.

# How to Sell 'a Better Beer' at Your Bar

## 01 Get the first glass right

Pick a keg size for your turnover; check line, tap and glass cleaning. Storage temperature and gas pressure per brand and equipment guidelines.

## 02 Explain the pour

Trial two pours; note the difference on the menu. Flag price, volume and foam before ordering.

## 03 Review the numbers together

Log first-glass order rate, reorders, wait time and waste. For standing areas, check short stays and comfort together.
