TREND

Proof of 'refreshing'

Draft-beer search peaks every summer —
Naver DataLab 2026, monthly relative index

Non-alc?

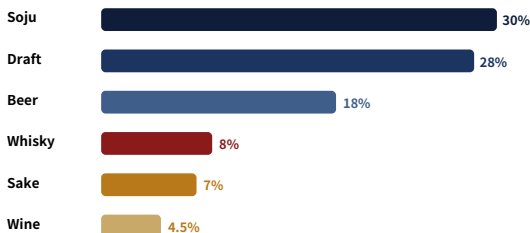

Interest grows, but **real sales through Sewang are under 1%**. Still a 'lineup filler,' not this summer's driver — focus on the basics (cold draft · varied food) is the practical call.

OUR DATA

What actually sells

Highball • N/A  under 1% each (a CVS phenomenon)

Summer growth engine

**Draft: ₩1.38B (Jan) → ₩2.15B (Jun),

SIGNATURE

A signature glass built on color

Flavored highballs and colorful drafts are **photo bait that lifts the check**. Trend colors (matcha · ube) fade fast — steady **fruit flavors** (yuzu · grapefruit · plum) run more reliably

Yuzu Highball

- ① Fill with ice + 1 whisky/vodka
- ② Top up 80% with tonic · soda
- ③ 1 tbsp yuzu syrup + slice
- ④ Keep it crisp — tonic only for N/A

Grapefruit Highball

- ① Grapefruit syrup · juice + soda
- ② Half-moon slice for color
- ③ A rosemary sprig for aroma
- ④ Bittersweet, zesty summer signature

Why it works

Color + a slice = a photo spot, more crispness, a higher check. Syrup builds it on existing highballs · draft; **plum · green** **grape** add variety — a fit for guest needs.
